Hearing Protection

Safety - Hearing Protection

MAX LITE SINGLE-USE EARPLUG

Without cord, packed in individual poly bags. (200 pairs per self dispensing box)
Ideal for long term hours & those with small ear canals.
Max Lite (PSHEPML) low pressure foam earplugs offer long term wear comfort and benefit in other benefits of pre-shaped foam earplugs. The non-invasive, more efficient self-sealing foam conforms to fit virtually any ear canal. Max Lite is ideal for that portion of the population with smaller ear canals. Green colour, packed in poly bags.

LASER LITE SINGLE-USE EARPLUG

Without cord, packed in individual poly bags. (200 pairs per self dispensing box)
The new look in comfortable hearing protection.
Laser Lite (PSHEPLL) is the next colour ear plug that has changed the expectations of hearing protection workers. The non-invasive, non-irritating, self-sealing foam conforms to fit virtually any ear canal. Laser Lite is ideal for that portion of the population with smaller ear canals. Pink/Yellow colour, packed in poly bags.

CLASSIC™ EARPLUGS

Classic Earplugs are made from a soft energy absorbing polymer foam which provides excellent hearing protection and all day comfort. Ideal for use where noise is a problem either in work or leisure activities. Classic small earplugs are also available for users who are looking for all the benefits of the standard size but who want greater comfort in smaller ear canals.

LEIGHT EARPLUG DISPENSER-EPD

Easy to use
The Leight Earplug Dispenser is a highly visible, permanent hearing protection centre that is easy for workers to use. Built with heavy-duty anodized aluminum and designed for wall installation, the Leight Earplug Dispenser dispenses plugs with a simple turn of the handle.

LASER-LITE MULTI-COLOR

FOAM EARPLUGS
CODE: PSHEPLL-1D/500
Laser-Lite multi-color foam earplugs, bulk packed for use in Leight Dispenser ONLY. Case of 2,000 pair (4 dispenser boxes/500 pair per box)

MAX-LITE LOW PRESSURE FOAM EARPLUGS

CODE: PSHEPML-1D/500
Max Lite low pressure foam earplugs, bulk packed for use in Leight Dispenser ONLY. Case of 2,000 pair (4 dispenser boxes/500 pair per box)

PLUG DEPOT

CODE: PSHEPDL1 - LASER LITE
CODE: PSHEPDL1 - MAX LITE
1. Plug Depot plus Plug Base for Max-Lite and Laser-Lite foam earplugs. 450 pairs in each Plug Depot.
CODE: PSHEPLL1D/PD4 - LASER LITE
CODE: PSHEPML1D/PD4 - MAX LITE
2. Plug Depots for Max-Lite and Laser-Lite foam earplugs. 450 pairs in each Plug Depot.

EPMAX-1D/500

Max pre-shaped foam earplugs, bulk packed for use in Leight Dispenser ONLY. Case of 2,000 pair (4 dispenser boxes/500 pair per box)

PUSH-INS™ EARPLUGS

The E-A-R Push-Ins earplugs revolutionise hearing protection with more advantages than many other foam earplugs. No roll down is required, a gentle push is all it takes for easy, consistent insertion and the flexible stem improves hygiene. The patented E-A-Rform foam tip is shaped and sized to mould to fit most ear canals.

PLUG DEPOT BY HOWARD LEIGHT!

Easy to use
Just twist knob and, one by one, a fresh pair of earplugs will be released! PLUG DEPOT keeps earplugs clean and free from debris so users can feel confident that they're using only the best in hearing protection!

EPML-30

With poly cord, packed in individual poly bags. (100 pairs per self dispensing box)

UVEX X-FIT

Without cord, packed in individual poly bags. (200 pairs per self dispensing box)

- Top protection-high attenuation level
- Top sound-excellent voice recognition
- Top fit-very comfortable to wear
- Convenient to handle

UVEX HI-COM

Without cord, packed in individual poly bags. (200 pairs per self dispensing box)

- Good protection-low attenuation level
- Innovative "patent pending" design absorbs inner sound of ear giving excellent speech recognition for improved communication
- Extremely comfortable

UVEX COM4-FIT

Without cord, packed in individual poly bags. (200 pairs per self dispensing box)

- Good protection-medium attenuation level
- Innovative "x" grip reduces pressure in the auditory canal and makes it easier to grip
- Comfortable to wear

EPQD30

With orange poly cord, packed in clear flip-top boxes (100 pairs per self dispensing box)
reusable
NRR 26
no rolling required
washes with soap and water

UVEX WHISPER

Without cord, packed in individual poly bags (100 pairs per self dispensing box)

- Re-usable ear plug-low attenuation level
- Useful for short time in low noise areas
- Easy to refill - Easy to Clean
- Convenient to handle

EPQB2

Replacement pads for Q82HYG Banded supra-aural hearing protector with 1 free pair Q8300HYG replacement pads enclosed

The Q82HYG (NRR 23), is designed for those who require moderate or intermittent hearing protection, as the supra-aural pads fit just inside the ear canal opening. With a soft comfortable fit, the Q82HYG is a great choice with an NRR of 23.

UVEX WHISPER BANDED

Without cord, packed in individual poly bags (100 pairs per self dispensing box)

- Re-usable ear band-medium attenuation level
- Useful for short time in low noise areas
- Easy to refill-Easy to clean
- Convenient to handle

ULTRAFIT™ EARPLUGS

For occasions when the convenience and permanence of a pre-moulded earplug is more suitable for your requirements. The unique oval size UltraFit earplug fits most ear canals comfortably and provides a high level of attenuation.

E-A-RBAND™ EARPLUGS

A comfortable, economic alternative to earmuffs, and earplugs. This innovative new semi-aural hearing protector follows leading brand music/headphone designs to provide you with a sleek, stylish, ergonomic and cool way to protect your hearing.

EPQB3

Replacement pads for Q83HYG Banded semi-aural hearing protector with 1 free pair Q8300HYG replacement pads enclosed.

The Q83HYG (NRR 23), is designed for those who require moderate or intermittent hearing protection, as the semi-aural pads fit just to the ear canal opening. With a soft comfortable fit, the Q83HYG is a great choice with an NRR of 23.

PELTOR™ OPTIME™ I

Optime I offers versatile protection and is very lightweight providing high wearer comfort. It combines a low profile with generous inner depth which makes it easy to combine with other equipment, allowing the ear to rest comfortably. Optime I is your choice for both short and long duration tasks. The wide, comfortable sealing rings are filled with a unique combination of fluid and foam, which gives optimum sealing and low contact pressure at the same time. It is ideal for use in environments with moderate industrial noise, such as workshops, sheet-metal shops and printing works, but also suitable outdoors, such as lawn mowing or in connection with hobby and leisure activities. Available in Hi-Viz green for workers who need hearing protection and be extra visible - on road construction sites, airports or other high-risk workplaces.

PELTOR™ OPTIME™ III

The Optime III earmuff is high performance hearing protector and has been developed for use in extremely noisy environments. The protection is based on a technology with a double casing minimising resonance in the holder casing resulting in maximum high-frequency attenuation. An acoustic connection between the inner volume and the volume between the casings in its turn provides maximum low-frequency attenuation. The sealing rings are broad and filled with soft plastic foam for the best fit and low contact pressure. The Optime III earmuff stands for the effective protection and highest comfort for the wearer. The product is also available in di-electric version without visible metal parts and in Hi-Viz green for workers who need hearing protection and be extra visible - on road construction sites, airports or other high-risk workplaces.

PELTOR™ OPTIME™ PUSH TO LISTEN

A whole new series of passive hearing protectors with a manual listening function is available. The design is as simple as clever - pressing a button on the shell enables you to reduce attenuation individually to follow conversation. This addresses one of the strongest needs at workplaces that require extremely powerful passive hearing protectors on one side and allowing to communicate with colleagues without removing or lifting any of the hearing protector apart from the ear to avoid the risk of hearing impairment. The Peltor Im Optime Im Push To Listen earmuff means no more cup lifting. It is an "Electronic passive" muff - which has one passive side and one electronic side. Simply push the button to listen, opening up the ear defender for communication. The electronic function automatically shuts off after 30 seconds and can be manually adjusted to close earlier if needed. The product is also available in di-electric version without visible metal parts and in Hi-Viz green for workers who need hearing protection and be extra visible - on road construction sites, airports or other high-risk workplaces.

UVEX 2 FOLDABLE

Medium hearing protector

- Advantages
- Exceptional wearer comfort
 - Resistant against bending and wrapping
 - High attenuation
 - Low Weight
 - Available with reflective headband for increased wearer visibility
- Applications
- For medium noise exposure situations

UVEX dBex 2300+

Light hearing protector

- Advantages
- Comfortable starter model
 - Easy handling/no spare parts
 - Replacement cushions
 - Di-electric

Applications

- For most noise exposure situations
